Subject Index

Activated carbon
modelling of adsorption isotherms of aromatic compounds in aqueous solution on active carbon, 81
Adsorption
adsorption of BSA on cross-linked chitosan: the equilibrium isotherm, B1
Adsorption isotherms
modelling of adsorption isotherms of aromatic compounds in aqueous solution on active carbon, 81
Amine
irreversible desorption of amine from amine–H^+-type resin complex by NaOH aqueous solution, 117
Anaerobic fluidized bed reactors
review on the application of anaerobic fluidized bed reactors in waste-water treatment, B37
Apparent diffusivity
influence of chemical reaction and internal convection on the determination of the apparent diffusivity of a catalyst, 91
Aromatic compounds
modelling of adsorption isotherms of aromatic compounds in aqueous solution on active carbon, 81
Autoxidation
homogeneous catalysed autoxidation of car-3-ene, α-pinene and tetralin, 67

Batch bioreactor
a detailed analysis of *Saccharomyces cerevisiae* growth kinetics in batch, fed-batch, and hollow-fiber bioreactors, B27
Bioreactors
heat transfer in bioreactors with dense suspension broths, B17
BSA
adsorption of BSA on cross-linked chitosan: the equilibrium isotherm, B1
Bubble column
heat transfer from a cylindrical probe immersed in a bubble column, 25

Car-3-ene
homogeneous catalysed autoxidation of car-3-ene, α-pinene and tetralin, 67
Catalyst
influence of chemical reaction and internal convection on the determination of the apparent diffusivity of a catalyst, 91
Chemical reaction
influence of chemical reaction and internal convection on the determination of the apparent diffusivity of a catalyst, 91
Coke
kinetic modelling of steam gasification of coke in a fluidized bed. I. Simplified approach, 125
kinetic modelling of steam gasification of coke in a fluidized bed. II. Modelling of hydrodynamic behaviour of the fluidized bed during reaction, 139
Cross-linked chitosan
adsorption of BSA on cross-linked chitosan: the equilibrium isotherm, B1
Cylindrical probe
heat transfer from a cylindrical probe immersed in a bubble column, 25

Dense suspension broths
heat transfer in bioreactors with dense suspension broths, B17
Desorption
irreversible desorption of amine from amine–H^+-type resin complex by NaOH aqueous solution, 117
Direct dyes
surface diffusion of direct dyes in porous cellulose membranes, B1
Dissolution
the granulometry of a polydisperse solid phase during dissolution, 75

Empirical correlations
prediction of multicomponent adsorption equilibrium data using empirical correlations, 9
Empirical method
an empirical method for the second virial coefficients of non-standard fluids, 149
Equilibrium isotherm
adsorption of BSA on cross-linked chitosan: the equilibrium isotherm, B11

Fed-batch bioreactor
a detailed analysis of *Saccharomyces cerevisiae* growth kinetics in batch, fed-batch, and hollow-fiber bioreactors, B27
Flow rate effects
liquid viscosity and flow rate effects on interfacial area in packed columns, 49
Fluidized bed
kinetic modelling of steam gasification of coke in a fluidized bed. I. Simplified approach, 125
kinetic modelling of steam gasification of coke in a fluidized bed. II. Modelling of hydrodynamic behaviour of the fluidized bed during reaction, 139
Fluidized bed reactors
review on the application of anaerobic fluidized bed reactors in waste-water treatment, B37

Granular bed filter
modelling of a cross-current moving granular bed filter, 105

© Elsevier Sequoia/Printed in The Netherlands

Granulometry
the granulometry of a polydisperse solid phase during dissolution, 75
Growth cultures
kinetics of growth for mixed cultures of micro-organisms growing on phenol, B55
Growth kinetics
a detailed analysis of *Saccharomyces cerevisiae* growth kinetics in batch, fed-batch, and hollow-fiber bioreactors, B27

Heat transfer
heat transfer from a cylindrical probe immersed in a bubble column, 25
Hollow-fiber bioreactor
a detailed analysis of *Saccharomyces cerevisiae* growth kinetics in batch, fed-batch, and hollow-fiber bioreactors, B27
Hydrodynamic behaviour
kinetic modelling of steam gasification of coke in a fluidized bed. II. Modelling of hydrodynamic behaviour of the fluidized bed during reaction, 139

Interfacial area
liquid viscosity and flow rate effects on interfacial area in packed columns, 49
Internal convection
influence of chemical reaction and internal convection on the determination of the apparent diffusivity of a catalyst, 91

Kinetic modelling
kinetic modelling of steam gasification of coke in a fluidized bed. I. Simplified approach, 125
kinetic modelling of steam gasification of coke in a fluidized bed. II. Modelling of hydrodynamic behaviour of the fluidized bed during reaction, 139
Kinetics
kinetics of growth for mixed cultures of micro-organisms growing on phenol, B55

Liquid viscosity
liquid viscosity and flow rate effects on interfacial area in packed columns, 49
Liquid–liquid dispersions
a separator for liquid–liquid dispersions, 113

Mass transfer
mass transfer coefficients in a trickle-bed reactor with high and low viscosity organic solutions, 41
Mass transfer coefficients
volumetric gas-liquid mass transfer coefficients in a rectangular bubble column with a rubber aeration pad, B51
Microorganisms
kinetics of growth for mixed cultures of micro-organisms growing on phenol, B55
Multicomponent adsorption equilibrium
prediction of multicomponent adsorption equilibrium data using empirical correlations, 9

NaOH
irreversible desorption of amine from amine–H^+-type resin complex by NaOH aqueous solution, 117
Non-standard fluids
an empirical method for the second virial coefficients of non-standard fluids, 149

Oxidation
oxidation of sulfur dioxide in a slurry reactor, 1

Packed columns
liquid viscosity and flow rate effects on interfacial area in packed columns, 49
Phenol
kinetics of growth for mixed cultures of micro-organisms growing on phenol, B55
Pinene
homogeneous catalysed autoxidation of car-3-ene, α-pinene and tetralin, 67
Polydisperse solid phase
the granulometry of a polydisperse solid phase during dissolution, 75
Porous cellulose membranes
surface diffusion of direct dyes in porous cellulose membranes, B1
Power law fluids
viscous dissipation effects on thermal entrance heat transfer to power law fluids in arbitrary cross-sectional ducts, 57

Rectangular bubble column
volumetric gas–liquid mass transfer coefficients in a rectangular bubble column with a rubber aeration pad, B51
Resin complex
irreversible desorption of amine from amine–H^+-type resin complex by NaOH aqueous solution, 117
Rubber aeration pad
volumetric gas–liquid mass transfer coefficients in a rectangular bubble column with a rubber aeration pad, B51

Saccharomyces cerevisiae
a detailed analysis of *Saccharomyces cerevisiae* growth kinetics in batch, fed-batch, and hollow-fiber bioreactors, B27
Second virial coefficients
an empirical method for the second virial coefficients of non-standard fluids, 149
Separator
a separator for liquid–liquid dispersions, 113
Slurry reactor
oxidation of sulfur dioxide in a slurry reactor, 1
Steam gasification
kinetic modelling of steam gasification of coke in a fluidized bed. I. Simplified approach, 125
kinetic modelling of steam gasification of coke in a fluidized bed. II. Modelling of hydrodynamic behaviour of the fluidized bed during reaction, 139
Sulfur dioxide
oxidation of sulfur dioxide in a slurry reactor, 1

Surface diffusion
surface diffusion of direct dyes in porous cellulose membranes, B1

Tetralin
homogeneous catalysed autoxidation of car-3-ene, α-pinene and tetralin, 67
Thermal entrance heat transfer
viscous dissipation effects on thermal entrance heat transfer to power law fluids in arbitrary cross-sectional ducts, 57

Trickle-bed reactor
mass transfer coefficients in a trickle-bed reactor with high and low viscosity organic solutions, 41

Viscous dissipation effects
viscous dissipation effects on thermal entrance heat transfer to power law fluids in arbitrary cross-sectional ducts, 57

Waste-water treatment
review on the application of anaerobic fluidized bed reactors in waste-water treatment, B37
